WHAT IS ALGAE? Algae is a **multi-billion-dollar food crop** in Asia where it has been used for health and longevity for fifty years. Algae was virtually unknown in the USA until ENERGYbits® launched ten years ago. Thanks to our efforts, algae is trending to be bigger than CBD. And for good reason. NASA says algae is the most nutritionally dense food in the world, has 1,000 x more nutrients than other vegetables, 1000 x more chlorophyll than greens and 3 x protein as steak. Not only is algae nutrient dense, it is scientifically proven to improve cellular health, detox, beauty, longevity, energy, sports, recovery, weight loss and also generates ATP when combined with red-light therapy,
